POSITION DESIRED: Tech Lead/Full stack Web Developer

CAREER OBJECTIVES

A hardworking man looking forward to improve my skills in my experiences within a motivating workplace and thereby contributing the company with proficiency.

WORK EXPERIENCE

Full stack Developer at DevCodic

June 2018 – July 2019

- Contribute and collaborate on various projects on both frontend and backend.
- Initiate projects for new clients.

Full stack Developer at coinpass.com

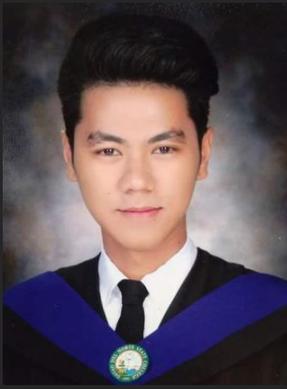

May 2018 – December 2022

- Create web apps using modern frameworks (SPAs) such as ReactJS and VueJS.
- Implement state management to accommodate complex application states.
- UI/UX implementation
- Design and configure RESTful APIs for seamless data exchange.
- Develop robust back-end services using Nodejs (NestJS) and PHP(Laravel).
- Implement authentication using JWT or OAuth2 to ensure secure user sessions and data protection.
- Third-party integration. Connecting external services such as payment gateways.
- Design schemas for Relational (Postgres, MySQL) or NoSQL (Redis, DynamoDB) databases.

Technical Lead at coinpass.com

December 2022 - Present

- Architecting end-to-end solutions that bridge front-end requirements with scalable back-end infrastructure.
- Contribute on implementing migration from monolithic approach to microservices
- Provide optimal support for mobile and backend integration
- Leading Sprint Planning and Daily Stand-ups to ensure the team remains unblocked and focused.
- Establish high standards for code quality and test coverage through peer review processes.
- Lead the deployment of changes from development to production and act as primary liaison between engineering team and other departments.
