PROFESSIONAL SUMMARY

Results-driven Technical Lead and Full Stack Developer with 6+ years of experience architecting and delivering scalable web applications across fintech and SaaS domains. Currently leading end-to-end engineering at coinpass.com — overseeing frontend, backend, DevOps, and cross-team delivery. Proven track record in microservices architecture, RESTful API design, and building high-performing engineering teams.

TECH STACK

Frontend	React.js, Vue.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, State Management (Redux / Vuex)
Backend	Node.js (NestJS), PHP (Laravel), RESTful APIs, JWT, OAuth2
Databases	PostgreSQL, MySQL, Redis, DynamoDB (NoSQL)
DevOps / Cloud	AWS, CI/CD pipelines, Microservices architecture, Docker
Practices	Agile / Scrum, Sprint Planning, Code Review, Peer Review, TDD
Integrations	Payment Gateways, Third-party APIs, Mobile & Backend Integration

WORK EXPERIENCE

Technical Lead · coinpass.com	<i>Dec 2022 – Present</i>
---	---------------------------

- Architect end-to-end solutions bridging frontend requirements with scalable backend infrastructure serving thousands of active users.
- Contribute in the migration from monolithic architecture to microservices, improving system scalability and deployment independence.
- Participate in Sprint Planning, Daily Stand-ups, and retrospectives — keeping engineering team aligned and unblocked across multiple concurrent projects.
- Established code quality standards and test coverage benchmarks through structured peer review processes.
- Manage deployment pipelines from development to production; primary liaison between engineering and product, operations, and business stakeholders.
- Provide mobile and backend integration support, ensuring seamless cross-platform performance.

Full Stack Developer · coinpass.com	<i>May 2018 – Dec 2022</i>
---	----------------------------

- Built and maintained complex SPAs using React.js and Vue.js with robust state management (Redux / Vuex).
- Designed and implemented RESTful APIs for seamless data exchange between frontend and backend services.
- Developed backend services using Node.js (NestJS) and PHP (Laravel); implemented JWT and OAuth2 authentication for secure user sessions.
- Integrated third-party services including payment gateways such as stripe and paypal and other external APIs.
- Designed and optimized database schemas for PostgreSQL, MySQL, Redis, and DynamoDB.
- Delivered UI/UX implementations in close collaboration with design and product teams.

Full Stack Developer · DevCodic	<i>Jun 2018 – Jul 2019</i>
---	----------------------------

- Contributed to and collaborated on full-stack projects across frontend and backend for multiple clients.
- Initiated and scoped new client projects from requirements gathering through delivery.

EDUCATION

Bachelor of Science in Information Technology Davao del Norte State College	<i>2014 – 2018</i>
Panabo National High School Graduated Valedictorian	<i>2013 – 2014</i>

KEY STRENGTHS

Full Stack Engineering	Technical Leadership	Systems Architecture
End-to-end ownership from UI to infrastructure	Agile teams, code standards, cross-team coordination	Microservices, APIs, cloud-ready scalable design
